

O¹ Colocation

Smart, Powerful and Cost-Effective

O¹'s SAS 70 certified Class A Data Center offerings are designed and optimized for maximum performance and availability so businesses can focus on more strategic areas of their growth. Co-locating with O¹ means not having to worry about Internet connectivity, bandwidth quality, power failures, or other service problems or interruptions that could negatively affect business continuity.

Features

- SAS 70 Type II certification
- Multiple carrier providers
- Multiple egress connections throughout the California network
- Power from same grid as California's Capital, no rolling blackouts
- Carrier-neutral connections to long haul carriers
- 24 x 7 network monitoring/notification
- Redundant fiber connections

Benefits

- O¹ staffed identification confirmation for all visitors
- Full color motion cameras throughout facility with 24 x 7 video recording
- 24" raised floor capable of supporting 2,000 lbs per sq. ft.
- Dual 500 kva Uninterrupted Power Sources (UPS) that operate in hot-synced pairs for redundancy
- N+1 Data Air units keep temperature and humidity controlled
- VESDA laser-mirror early warning fire system - Pre-Action, dry-pipe sprinkler design
