

Welcome to O1 Communications

We thank you for choosing O1 for your Web Hosting needs

Included on this document is an email from our Sales Admin providing all the information you need for your Web Hosting account.

DNS Requirement:

DNS Servers determine where to point your website. Please follow one of the following steps as it pertains to your situation.

Scenario 1:

O1 will NOT host DNS for your domain –

If another company will be providing DNS for your domain, please have them change the A records for your domain name and for the hostname “www” and point them to the IP address of O1s web server. This IP address will be provided on the account info provided.

Scenario 2:

O1 will host DNS for your domain –

The A records will be set up by the cPanel when DNS is set up for your domain.

Site Administration:

O1 uses the cPanel control panel offering site administration with an easy web interface. You can manage your website(s) via the URL provided in your account info.

The cPanel has built-in tutorial information to provide first time users the ability to manage their own account.

If you have any questions concerning your hosting account please call our support group @ 888.444.1111 and reference the ticket number provided in your hosting account info.
